

## REQUESTS FOR PROPOSALS M4826

---

### ROUTE 9A LANDSCAPE MAINTENANCE WORK

### QUESTIONS & ANSWERS

**Q. Can you please specify the blocks or phases in the route that can be done with a weed-whacker rather than hand weeding?**

A. In the past the only sections that were weed wacked were the medians from 30th St. to 34th St. and the buffer area from Clarkston St. to Morton St and 29th to 38th St. However, broadleaf weeds would still need to be removed manually. Weed-wacking any area would be determined and approved by the Trust in consultation with the contractor.

**Q. Can you please clarify to what satisfaction, or height, that weeds must be pulled?**

A. Weeds are manually removed down to and including most of the root system. All weeds are removed from sites.

**Q. If an area has heavy grass seed growing, as well as some shrubs, how close to the shrubs can we come with weed-whackers?**

A. 6" from base of shrub/tree is acceptable.

**Q. If there is grass in a median, but distant from shrubs, are we allowed to use a weed-whacker?**

A. Generally no but if significant stands of shrubs are missing this would again be determined and approved by Trust
