REQUESTS FOR PROPOSALS # M4826

ROUTE 9A LANDSCAPE MAINTENANCE WORK

SUBMISSION DEADLINE MAY 3, 2017

ADDENDUM #1

RFP #M4826 is hereby amended to include the additional NYSDOT permit information:

“Attached is a summary of the NYSDOT permit application procedure for a highway work permit along Route 9A. A lane closure and NYSDOT permit is required only if a vehicle is used for the proposed maintenance of the landscaped areas. Traffic Safety & Mobility has prepared the attached checklist which identifies the issues that need to be addressed in preparing a work zone traffic control (WZTC) plan for the lane closure. NYSDOT has also published standard details for short term and short duration lane closures, which may be appropriate for your proposed activity. These drawings may be accessed at the following link:

<https://www.dot.ny.gov/divisions/operating/oom/transportation-systems/safety-program-technical-operations/work-zone-control/typical-applications>

The permit application must include site specific WZTC plans not copies of the generic standard details. Work hours for lane closures are stipulated by NYCDOT. Insurance requirements are set out in detail in the application summary and also in the permit application form PERM 33.”

Respondents should consider the above information when submitting their proposals.
