

Wetlab Fish Biology

1. Where do the organisms in the Wetlab come from?
 - A. Hudson River Estuary
 - B. Exotic pet stores
 - C. The Atlantic Ocean
 - D. Long Island Sound
2. Which of the following characteristics is true about benthic fish?
 - A. Benthic fish are very active swimmers
 - B. Benthic fish are often seen at the surface of the water
 - C. Benthic fish are usually very colorful
 - D. Benthic fish live near the bottom of the river
