

Proposed Amendment to General Project Plan for Significant Action Notice

The original GPP regarding the Pier 52 portion of the Gansevoort Peninsula read in its entirety:

The plan calls for a park to be created on the Gansevoort Peninsula following relocation of the sanitation facilities currently there. The plan calls for a ballfield and sunning beach near the existing riprap edge to the south. Other facilities proposed for the Gansevoort peninsula include a boating center, children's play area, concessions, a dog run, and water taxi stop.

The Trust proposes to amend this language of the GPP by adding the language shown in underline:

The plan calls for a park to be created on the Gansevoort Peninsula following relocation of the sanitation facilities currently there. The plan calls for a ballfield and sunning beach and permanent large-scale sculpture near the existing riprap edge to the south. Other facilities proposed for the Gansevoort peninsula include a boating center, children's play area, concessions, a dog run, and water taxi stop.
