

REQUESTS FOR QUOTES

For Compost Data Service Consultation

Contract Number EA170

Q &A

- Question: What is the location of the compost site? Is it a single location or multiple locations?

Answer: It is located on the Hudson River at 32nd St. It is just West of Route 9a. This is the only location within Hudson River Park for composting.

- Question: Is there any electrical outlet or power source available at the compost site?

Answer: There is an electrical source at this site.

- Question: Is it possible to get internet (Wi-Fi) service at the compost site? If not then is it possible to place a device at the compost site securely, preferably indoor location?

Answer: We do not have internet service at the site. It is possible to place a device on site but not indoors. There is one shed located on site, but it is about 200feet from the electrical source. A small box or cabinet can be used to cover any devices needed closer to the electric source.
