

Hudson River Park Spring Field Trips

Our River Project team offers a wide range of hands-on field trips for students ages K-12 year round. Join us this season for educational experiences at indoor and outdoor locations throughout the Park.

\$200/program; fee waiver available for Title I schools.

During field trips, students will:

- Engage in hands-on STEM lessons focused on fish, plankton, climate change, pollution and local ecology.
- Conduct activities and experiments to better understand the Hudson River ecosystem.
- Explore Hudson River Park's vibrant environment above and below the River's surface.

**Book now for programs
April - June 2024**

Field Trip Offerings

Wetlab Wildlife

*Grades K-12
Pier 40 Wetlab*

Meet Hudson River wildlife face-to-face in the Park's unique research aquarium.

Shoreline Ecology

*Grades K-12
Pier 26 Tide Deck*

Explore NYC's natural coast and learn about the plants and animals found at the water's edge.

Salt Marsh Science

*Grades 3-12
Gansevoort Peninsula*

Take a look through our digital microscope and observe some of the Estuary's smallest living organisms.

Climate and Our Coast

*Grades 6-12
Pier 57 Discovery Tank*

Investigate the impacts of climate change on our atmosphere and shorelines through hands-on modeling.

Oyster Field Lab

*Grades 3-12
Pier 40 Wetlab*

Collect data as a field scientist and discover the important role oysters play in the Hudson River.
